

How to vote — Quick guide

- 1 Get your code**
 The organizer gives you a QR code or a personal link. It's your voting code, for one-time use.

★ Judges (QUALIFICATA)
👤 Public (POPOLARE)
- 2 Open and enter**
 Scan the QR code with your camera, or go to the site and enter the **event code**.
Just one tap: no registration, no password.
- 3 Enter your voting code**
 16 characters, split into **4 groups of 4**. If you open the link, it's already pre-filled.

A1B2
C3D4
E5F6
G7H8
- 4 Choose and vote**
Numeric vote: tap a candidate, then give a **score from 1 to 10**.
Preference vote (public only): tap the candidates you prefer, up to the allowed maximum.

7
9
10
- 5 Complete your ballot**
 Numeric vote: one vote per candidate. Preference vote: up to *N* candidates, with a "Preferences cast X/N" counter. Either way the vote is **not editable after submitting** and a progress bar shows what's still missing.
The page updates itself: if voting closes, your vote is locked.
- 6 Final confirmation**
 When you're done, press "**Final confirmation**": the code is locked and your vote becomes official.
Done! Thanks for voting.

Warning

If voting is shown as closed, you can no longer vote — try again later or contact the event staff.

Numeric or preference vote?

The organizer decides when creating the event. **Qualified judges** always vote with a score from 1 to 10. The **public** ballot, instead, may be preference-based: you pick one or more candidates (up to the maximum shown at the top of the page), with no scores.
